

Accessing care for minor ailments has never been easier! With the Pharmacy First Scheme, which was launched on 31st January, you can now receive prompt care for a range of conditions such as coughs, colds, and minor rashes directly at your local pharmacy. This initiative enables you to bypass the wait for a GP appointment, offering a speedy and convenient way to obtain both advice and treatment. It's designed to ease the strain on our healthcare system by providing an efficient alternative for managing minor health concerns.

For a detailed look at the specific minor issues covered by this scheme, please refer to the chart below. This will help you understand how the Pharmacy First Scheme can assist you with your healthcare needs. Discover today how Pharmacy First can make a difference in your health and well-being.
